#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1,10,13-47 are rejected under 35 U.S.C. 102(e) as being anticipated.

by TREACY et al 6342518

Claims 18-47 add specification of the moieties of claims 1, 15, 16; all of which are inclusive of the I(a) compound of TREACY, thus the rejection is maintained, as the TREACY disclosure is no better/no worse than applicant's, in so far as methods of controlling the vast number of insects claimed are concerned.

TREACY, although commonly owned, is available under 102 (e); but not under 103.

Applicant's arguments filed 4/11/06 have been fully considered but they are not persuasive. Applicant's arguments have been considered in the continued rejection. The data in the case, and declarations, suggest efficacy, with required experimentation. 3000 PPM was only able to kill 40% of ants of pogomymex species (I, pages 18, 19 of declaration of 4/11/06) to determine whether a particular species can or can not be treated with an effective amount of any of the compounds claimed. Although a limited number of ant and termite species were effectively controlled in simulated habitat or soil, it is not at all clear that wood treatment, or treatment of the claim 15 materials or expected loci of pests, or crop treatment, would be an effective means of control. Methods limited to ants and termites treated with the demonstrated effective compound (i.e. claim 13 compound) are seen as outside the TREACY's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to NEIL LEVY whose telephone number is 571-272-0619.
